TOPIC OR DESCRIPTION:

Request to add camera models to the approved list of cameras allowed to be used in Private for Hire

HOW IS THIS IMPACTING YOUR INDUSTRY:

Since our EYECAM MD1000 was added to the list of approved cameras a while ago, technology has evolved and there has been significant developments in solutions provided to drivers and passenger that improve safety and security by introducing AI technology and capabilities

REASON FOR CONSIDERATION OR CHANGE TO THE REGULATIONS?

In order to be able to provide the industry with these advanced solutions, we would need the committee to consider adding certain camera models that include that technology into the list of approved models

PROPOSED SOLUTION:

We would ask the committee to add the following models to the list of approved models:
EYEDASH AI
EYECAM MD1000 AHD

Eyeride's EYEDASH AI is an advanced dash camera with a built in AI processor and dual view (Road and Driver) to detect driving events such as lane departure, forward collision, and driver behavior such as fatigue, distraction, smoking, and phone call usage. The EYEDASH AI can alert the driver in real-time of dangerous behaviors, and upload events to a monitoring platform to be reviewed by a fleet manager to aid them in coaching the drivers to reduce risk.

For more information about this camera you could visit : <https://eyeride.io/solutions/eyeride-ai/>
You can also download the camera datasheet using the following link:
https://drive.google.com/file/d/1auXmcD2P2E6DDzNwIW50q6IHcBNnColB/view?usp=share_link

MD1000 AHD is a high definition version of the MD1000 that works with the EYEDASH AI to provide an additional clear view of the vehicle backseat.

Please contact us if you require more information. Thank you.
